

I live in a rural area 75 miles north the broadcast area for K-Love radio 91.9 Denver. This station serves my need to listen to Christian music in a style not duplicated by any other station oin my area. I am concerned that if low-powered stationsd are given priority, I will not be able to receive this broadcast from Denver in my rural location. This service is a unique radio station to my area offering a type of entertainment which is in alignment with my beliefs and needs. It is in the public interest to continue to make this broadcast available for the many outlying rural areas around Denver. There are no other alternatives.
